

Hello,

My name is Fred Reyna. I have been training dogs for over 25 years. Thru my experiences training both upland bird dogs and tracking dogs, I have developed a proven program to condition all breeds of dogs to avoid snakes. I condition each dog individually and I make sure that they have made the proper association and react accordingly before they leave. I tailor each session to that specific dog and always encourage owner participation.

I try to host at least 2 clinics per year (one in the spring and one in the fall) usually in or around Llano, TX, and I will travel to host clinics if there is enough interest. I will also conduct private sessions upon request.

I prefer dogs to be a minimum of 8 months old in order for them to make the proper associations.

I also recommend all dogs go thru at least one refresher training.

For more information or to schedule your private session, please contact me at :

Texas Snake Avoidance

SNAKE AVOIDANCE TRAINING

*“an ounce of prevention is
worth a pound of cure”*

As responsible pet owners, it is our duty to help prevent snake bites if at all possible. “Snake-breaking” is a proven technique that is used to condition dogs to avoid snakes, and with snakes on the move, now is the time to have your dog trained to avoid them. Veterinarians treat hundreds of snake bites each year. Snake-breaking or Snake Avoidance will help reduce the risk of your dog coming into contact with snakes and being bitten.

We specialize in training companion, working and hunting dogs to avoid venomous snakes. We use live Rattlesnakes, Copperheads and Water Moccasins (when available) that have been rendered harmless. We then introduce the dog to the sight, sound and smell of the snakes. At a precise moment the dog alerts on these senses I give a brief stimulation with the E-collar. The dog associates the snake with the stimulation.
