Paw Print Genetics™ performed the following genetic tests on your dog. See the Laboratory Report for interpretation and recommendations based on these findings. The genes/diseases reported here were selected by the client. Normal results do not exclude inherited mutations not tested in these or other genes that may cause medical problems or may be passed on to offspring. This test was developed and its performance determined by Paw Print Genetics. This laboratory has established and verified the test's accuracy and precision. Genetic counseling is available at Paw Print Genetics.
